Design and Video Content Creation.

Projects

Enhancing Student Experience & Admin Efficiency With MyStudy Dashboard

November 2024 | Dashboard

This project is a platform designed to create a comprehensive dashboard for MyStudy, focused on improving the management of learning activities for both students and administrators. It aims to simplify access to learning materials, track student progress, and optimize administrative tasks.

Carousell UI/UX Revamp For Enhancing User Experience

October 2024 | Website

This project focused on attracting customers to shop on Carousell by increasing buyers' trust in sellers, updating the design and improving the layout.

Redesigning HappyFresh Application For Optimize And Enjoyable Shopping

September 2024 | Mobile App

This project designed an online shopping application with a focus on intuitive user experience, requirements analysis, and user flow development. The result is an interactive prototype using Figma.

Enhancing Student Experience & Admin Efficiency With MyStudy Dashboard

Role

UI/UX Designer

Duration

2 Weeks

User Behaviour

Students and administrators

Tools

About the Project

The MyStudy Dashboard project is an **initiative aimed at developing a comprehensive and interactive tool** for managing student progress, class schedules, and administrative tasks, providing both students and administrators with a seamless and efficient learning experience.

Goals

Optimize Student Learning Experience, Improve Administrative Efficiency, Enhance Overall Platform Performance.

My Study LMS –
Key Features

Class Management

Schedulling

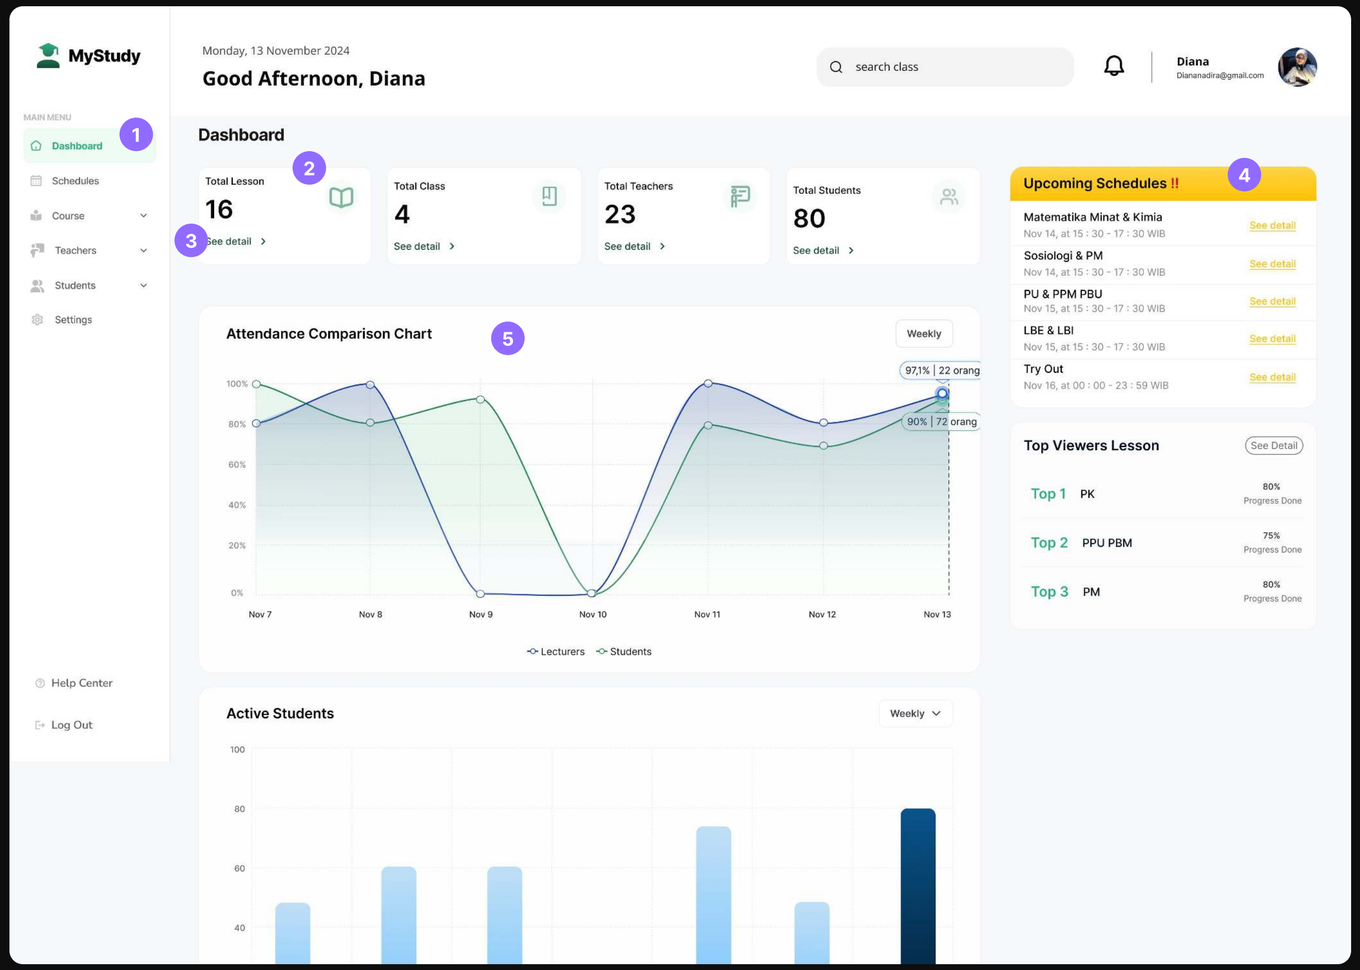

Attendance Tracking

Schedule overview

Exam Acces

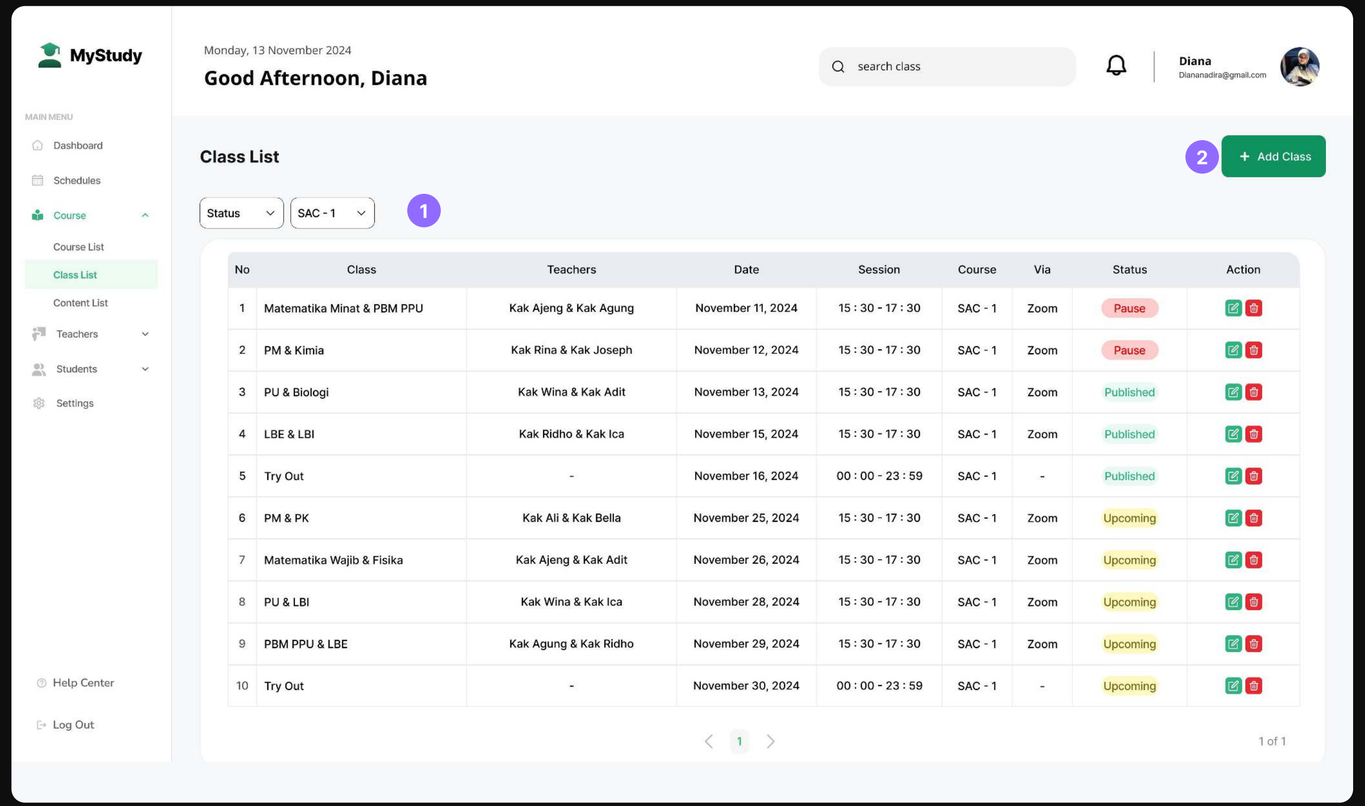

Attendance Overview

Design Solution

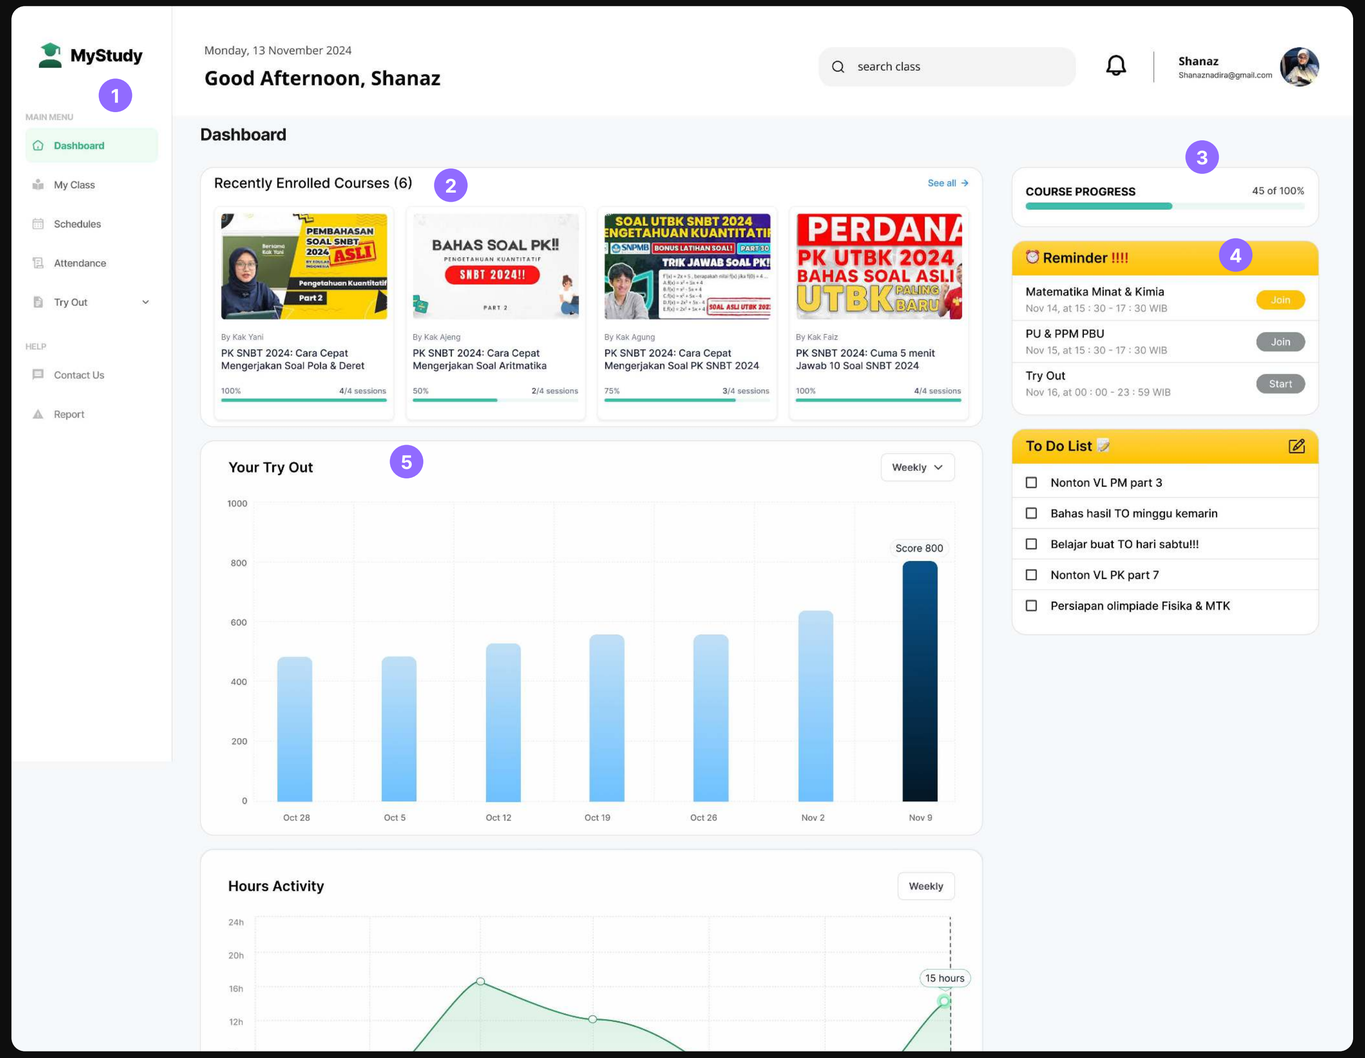

Admin Overview Page

1. Sidebar view to navigate overall features and dashboard pages.
2. Summary view of the whole dashboard page.
3. Tertiary button to navigate from summary to availability status.
4. A table list displaying upcoming classes and top subject viewers to provide a clear overview of schedules and popular subjects.
5. Attendance and number of active students analysis chart.

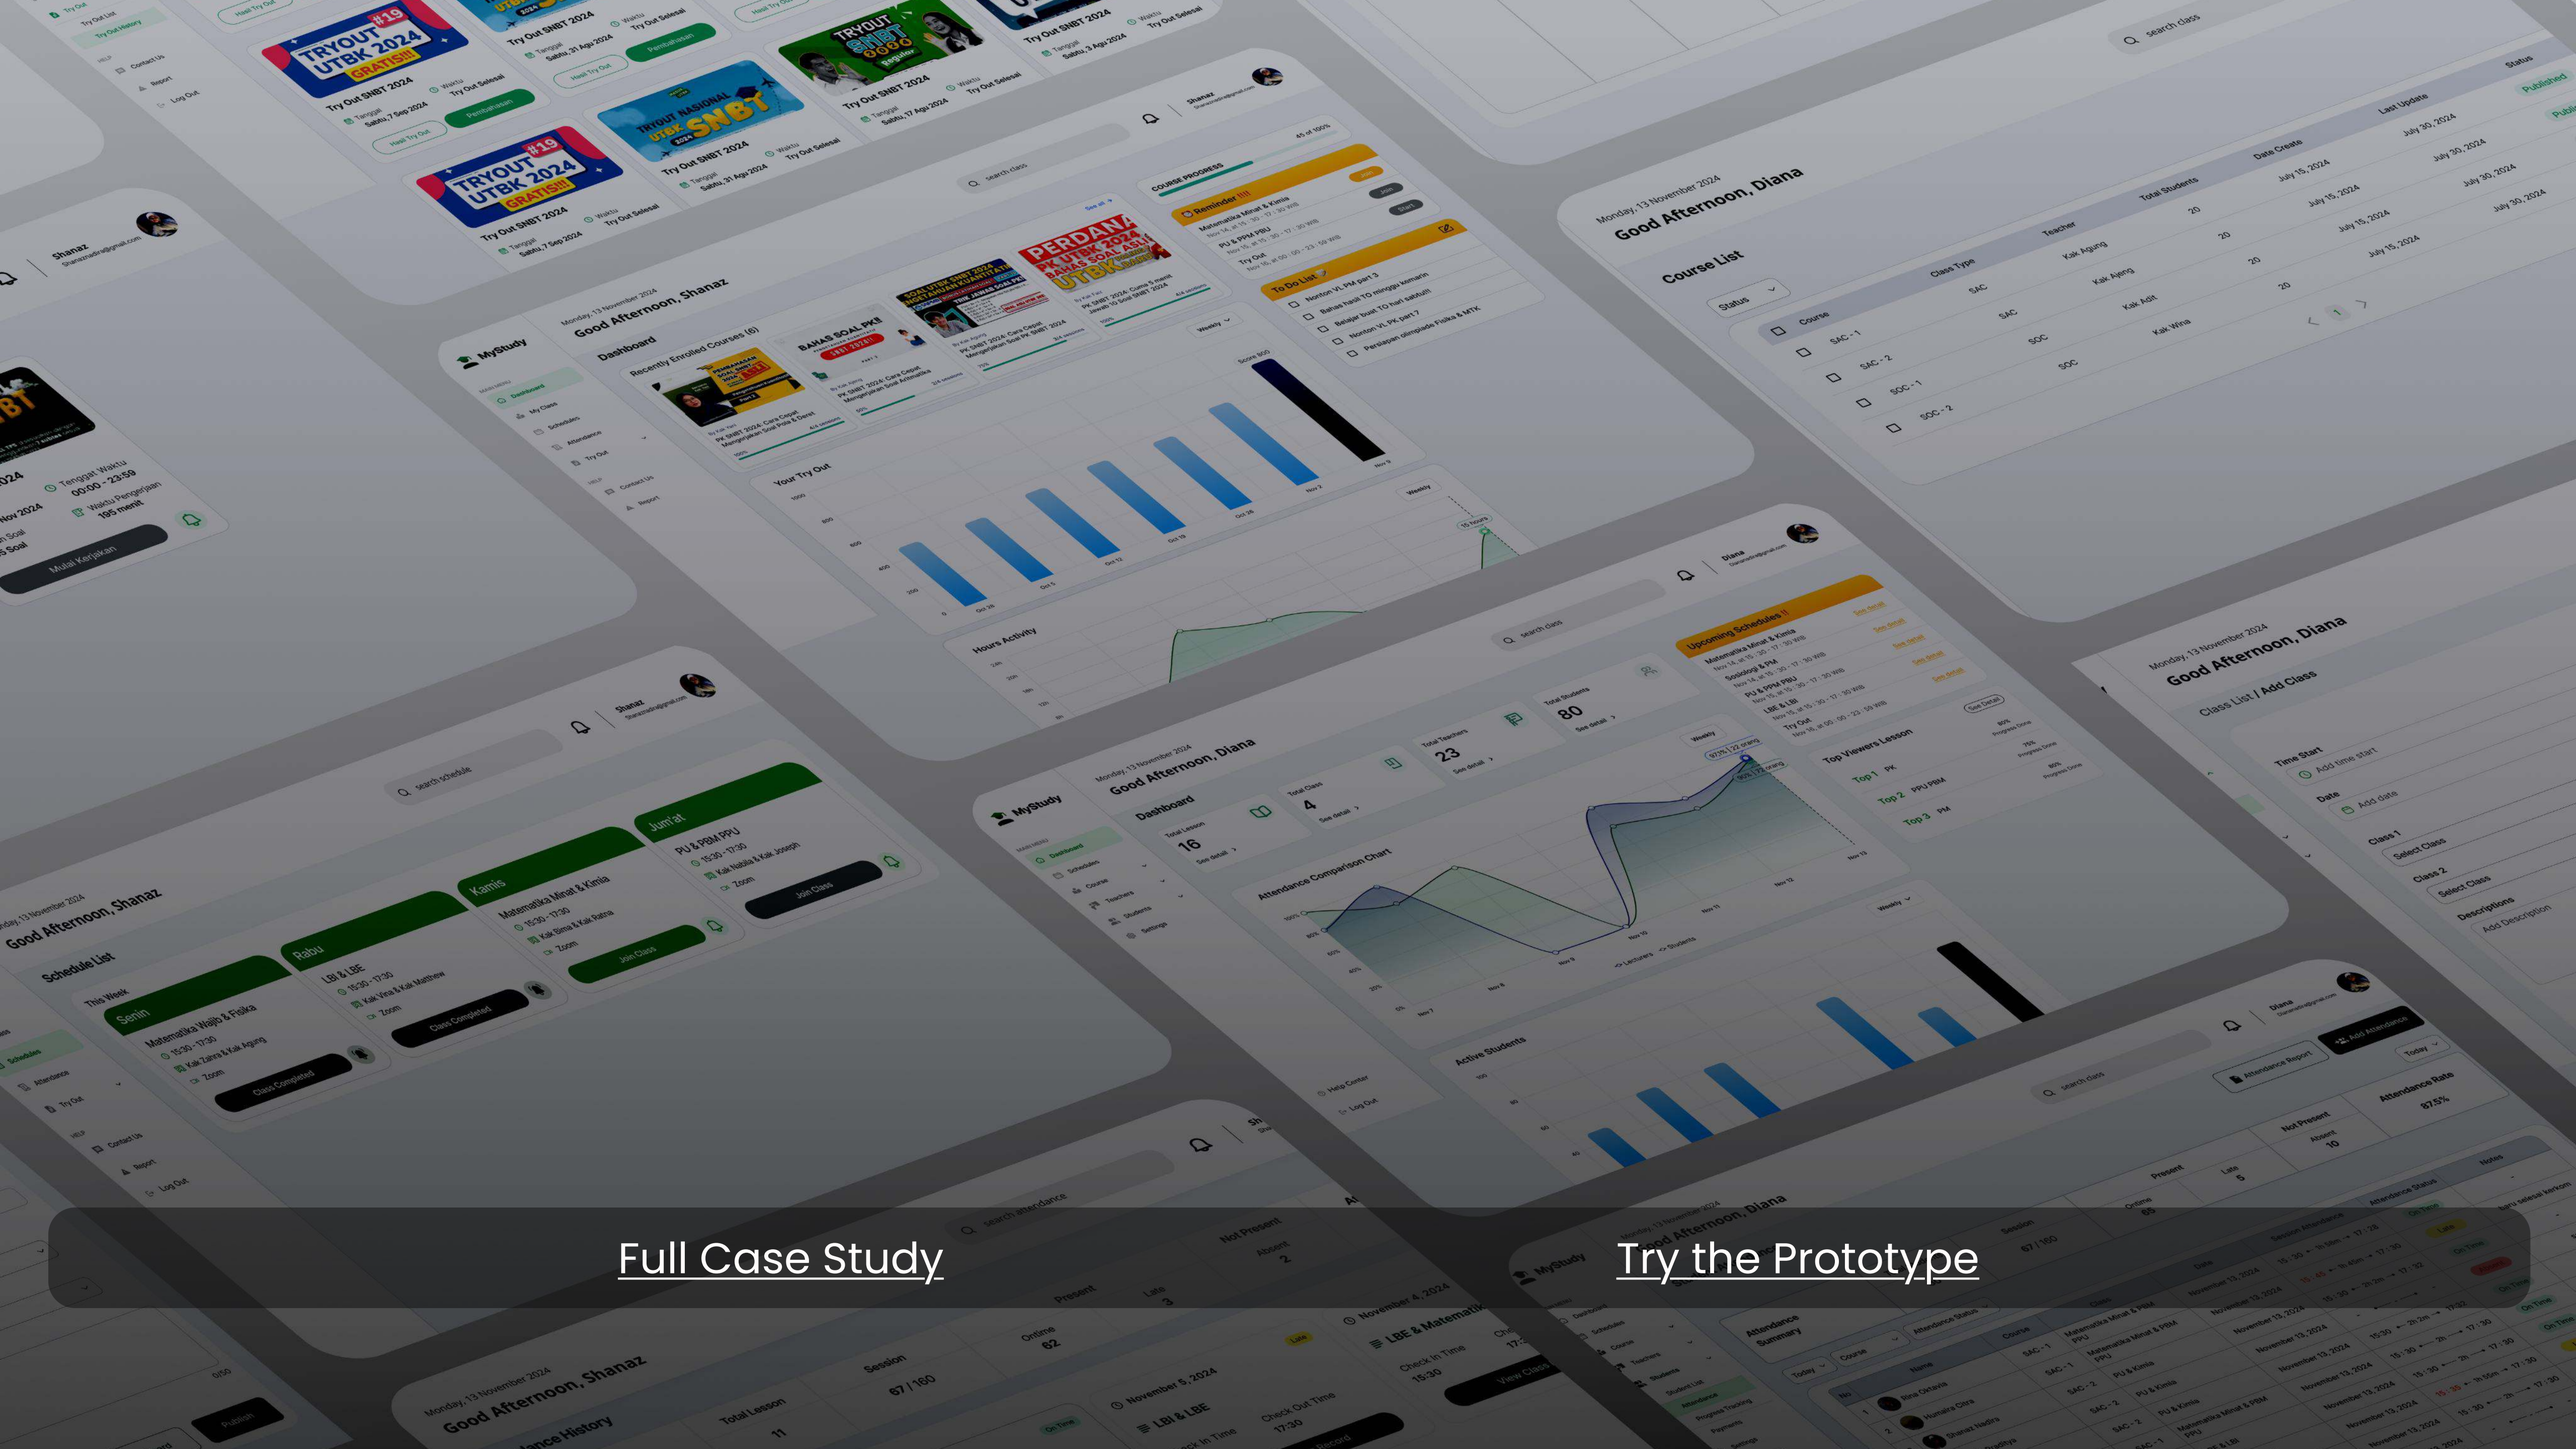

Admin Class Schedule Page

1. List the class schedule to add notify the schedule to teachers and students.
2. Add Class Schedule.

Student Overview Page

1. Sidebar view to navigate overall features and dashboard pages.
2. Videos recently enrolled courses.
3. Presentase course progress student.
4. Reminder class & tryout schedule information and to do list chart.
5. Result tryout and hours ctivity student analysis chart.

2024 Website Improvement - Carousell

Website Desktop

Carousell UI/UX Revamp For **Enhancing User Experience**

Role

UI/UX Designer

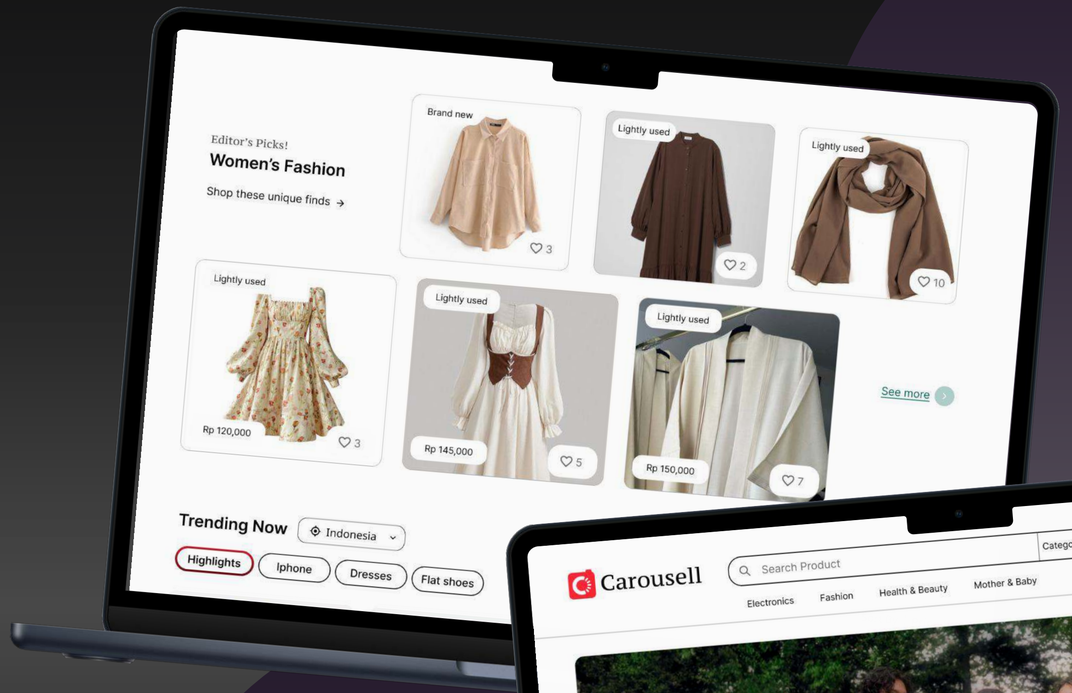

Duration

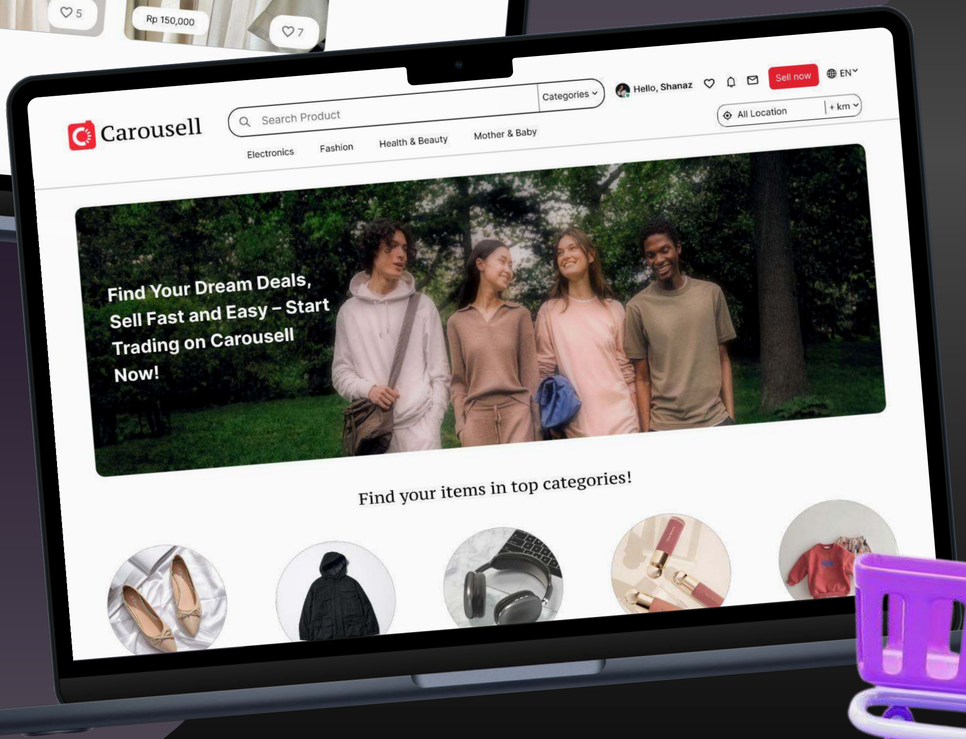

2 Weeks

User Behaviour

Second Hand Lover

Tools

About the Project

Carousell is a popular online marketplace where users can buy and sell goods, ranging from second-hand items to new products. With an ever-growing user base and competitors like OLX, Facebook Marketplace, and Shopee.

Interest in preloved items is growing in Indonesia. Surveys reveal that 70% of Indonesians have purchased preloved products, primarily in the fashion category. (Sumber: Carousell)

Goals

Enhance security and privacy features, update the website design, improve layout, button placement and visibility.

Why Carousel needs to be improved ?

Many users distrust online shopping due to **frequent scams, including fake sellers and counterfeit goods,** which undermine confidence in digital transactions. (Sumber: X App)

Trust Issues

Interesting

Users perceive the Carousell website as outdated, which makes them more drawn to its competitors with modern, visually engaging interfaces. (Sumber: X App)

Users often feel confused and frustrated when navigating the Carousell website, **struggling to find action buttons** to achieve their goals. (Sumber: Usability Testing & Interview)

Frustrations

Understanding The Brief and Needs

Strategy

The research team, interviewed andconducted user usability test and saw user responses to the Carousell website, from there we found several important findings before making improvements.

Discovery

- Summarize Top Findings
- Create User Personas
- Create HMW （How Might We)
- Look for Comparisons with Brand Competitors

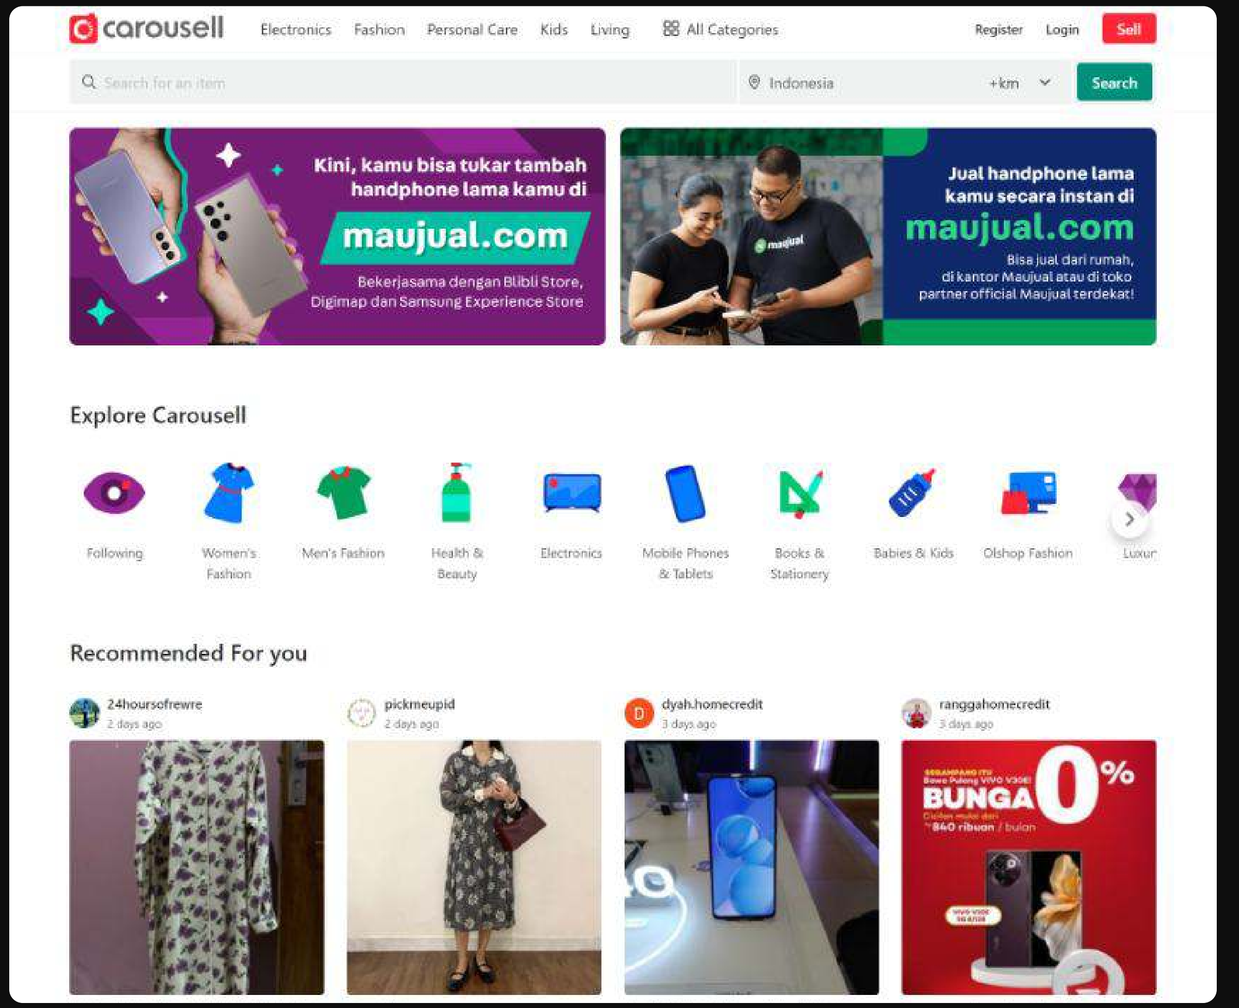

Solution

- Make a User Flow
- Sketching or Wireframing
- High Fidelity
- Create a prototype according to the planned flow
- Re-perform a usability test of the improved results, and then it will be re-evaluated

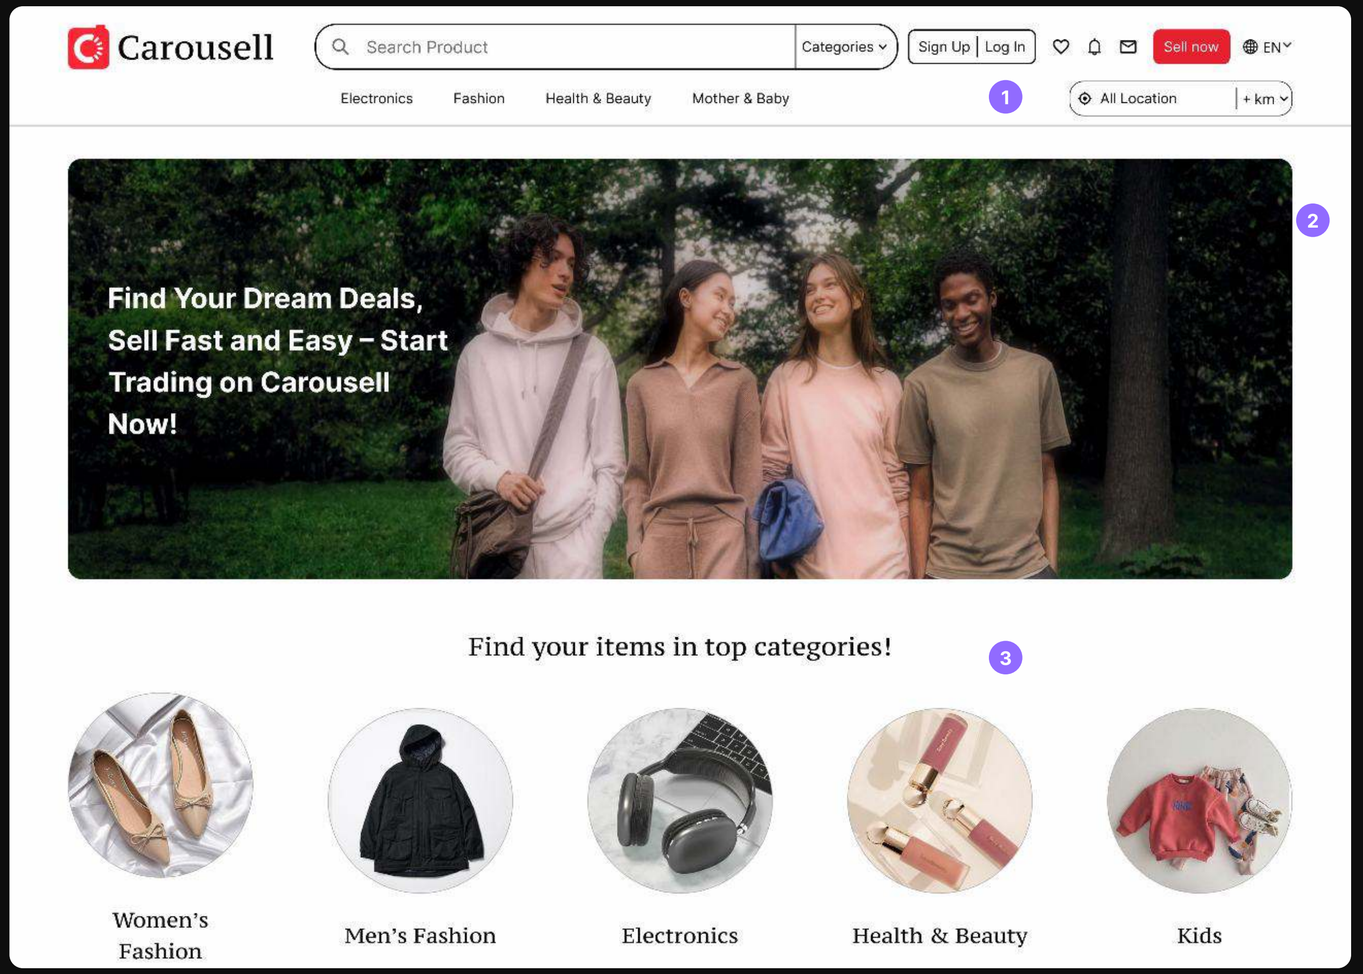

Before Improvement

- Doesn't have a hero on the landing page
- Suboptimal placement of the language setting feature
- Lack of responsiveness and intuitive design

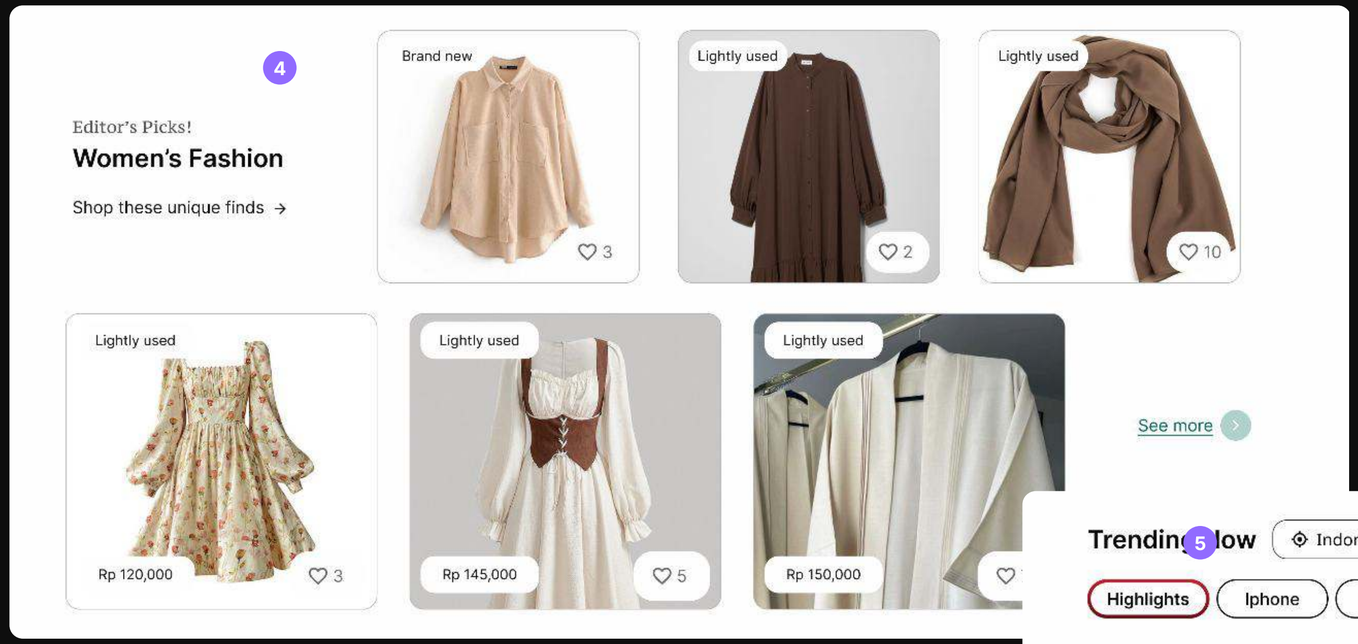

- Doesn’t have a verification feature for sellers
- Cluttered Layout and spacing

Design Solution

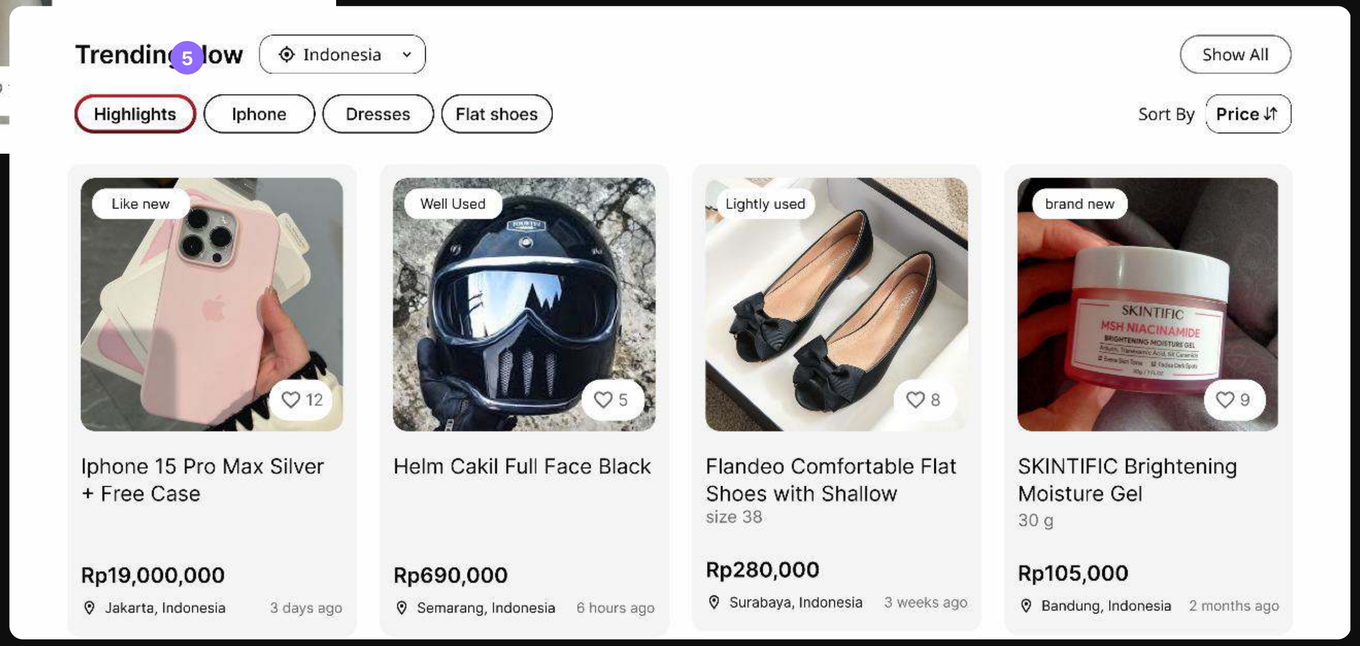

Landing Page

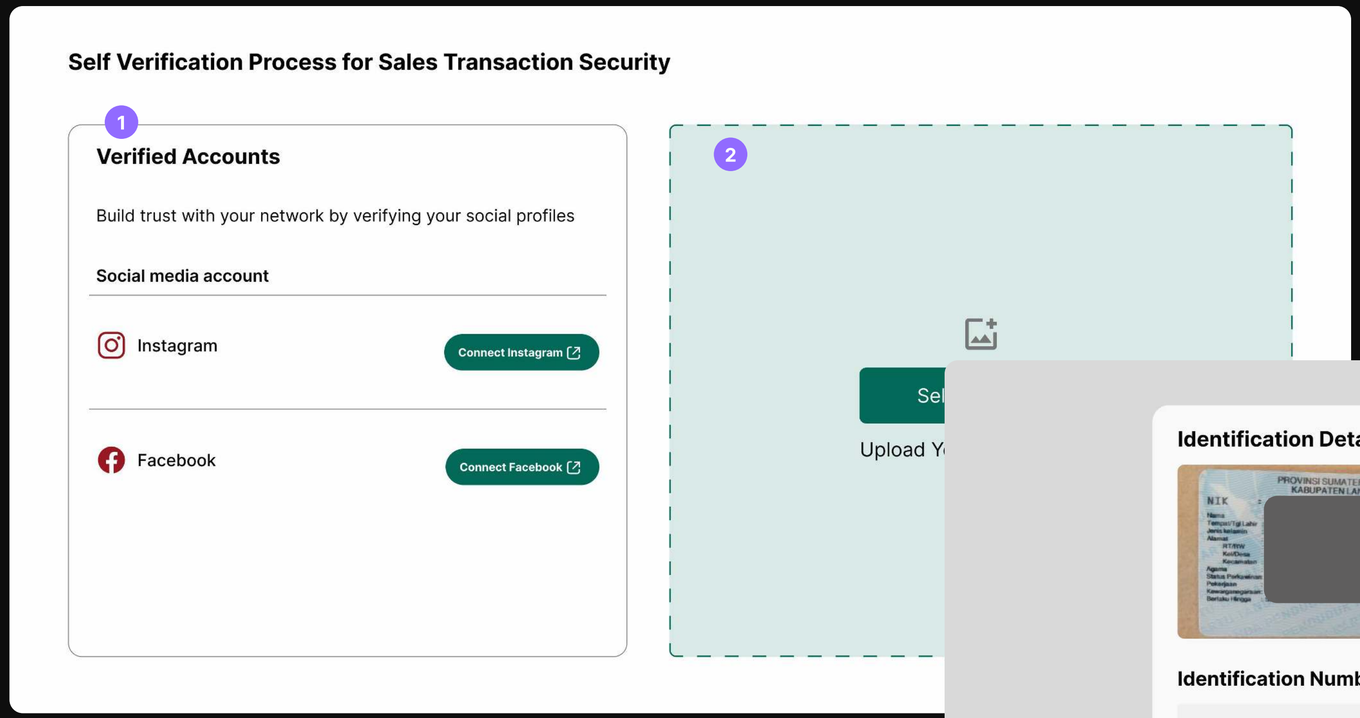

1. Change the heading display.
2. Added a hero about the carousel.
3. Section displays the best and most popular category from Carousel.

4 The section that displays recommended products from Carousel.

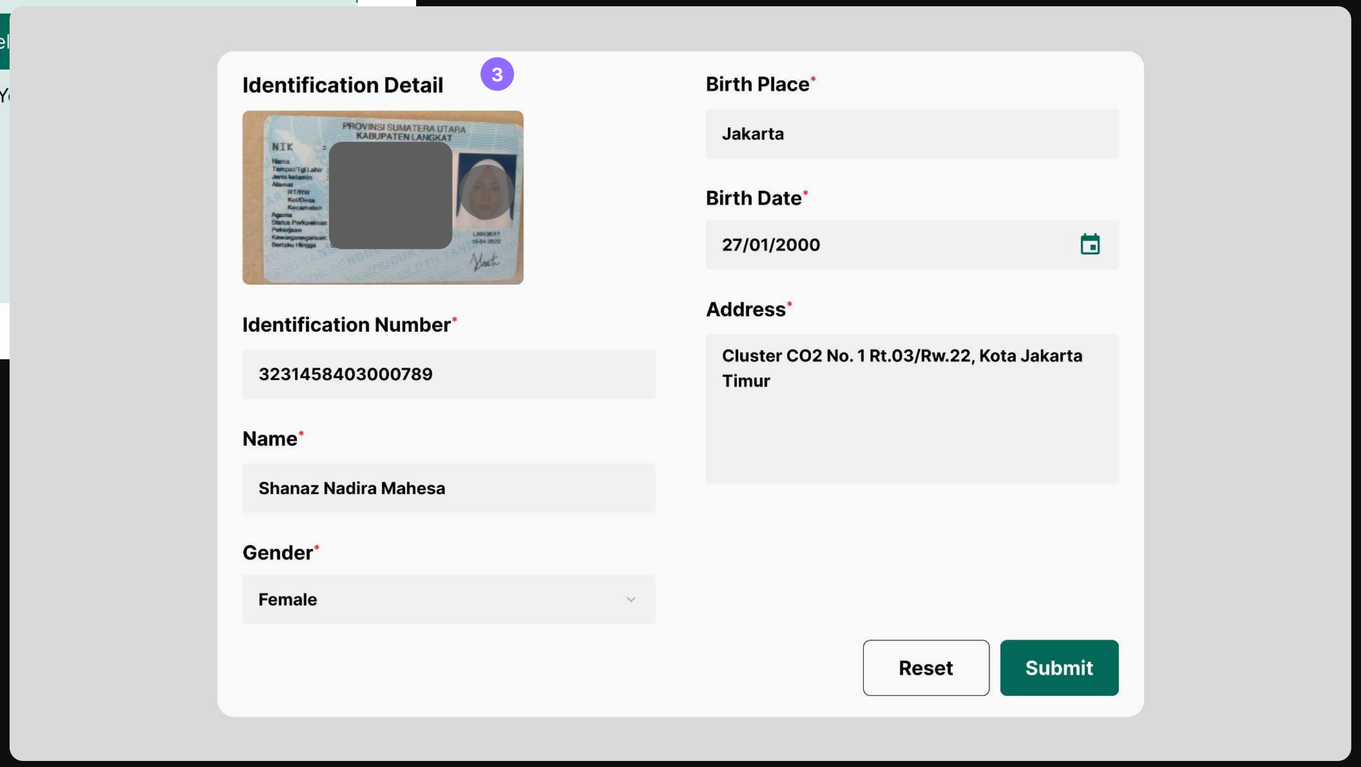

5 The section that displays the trending products from Carousel.

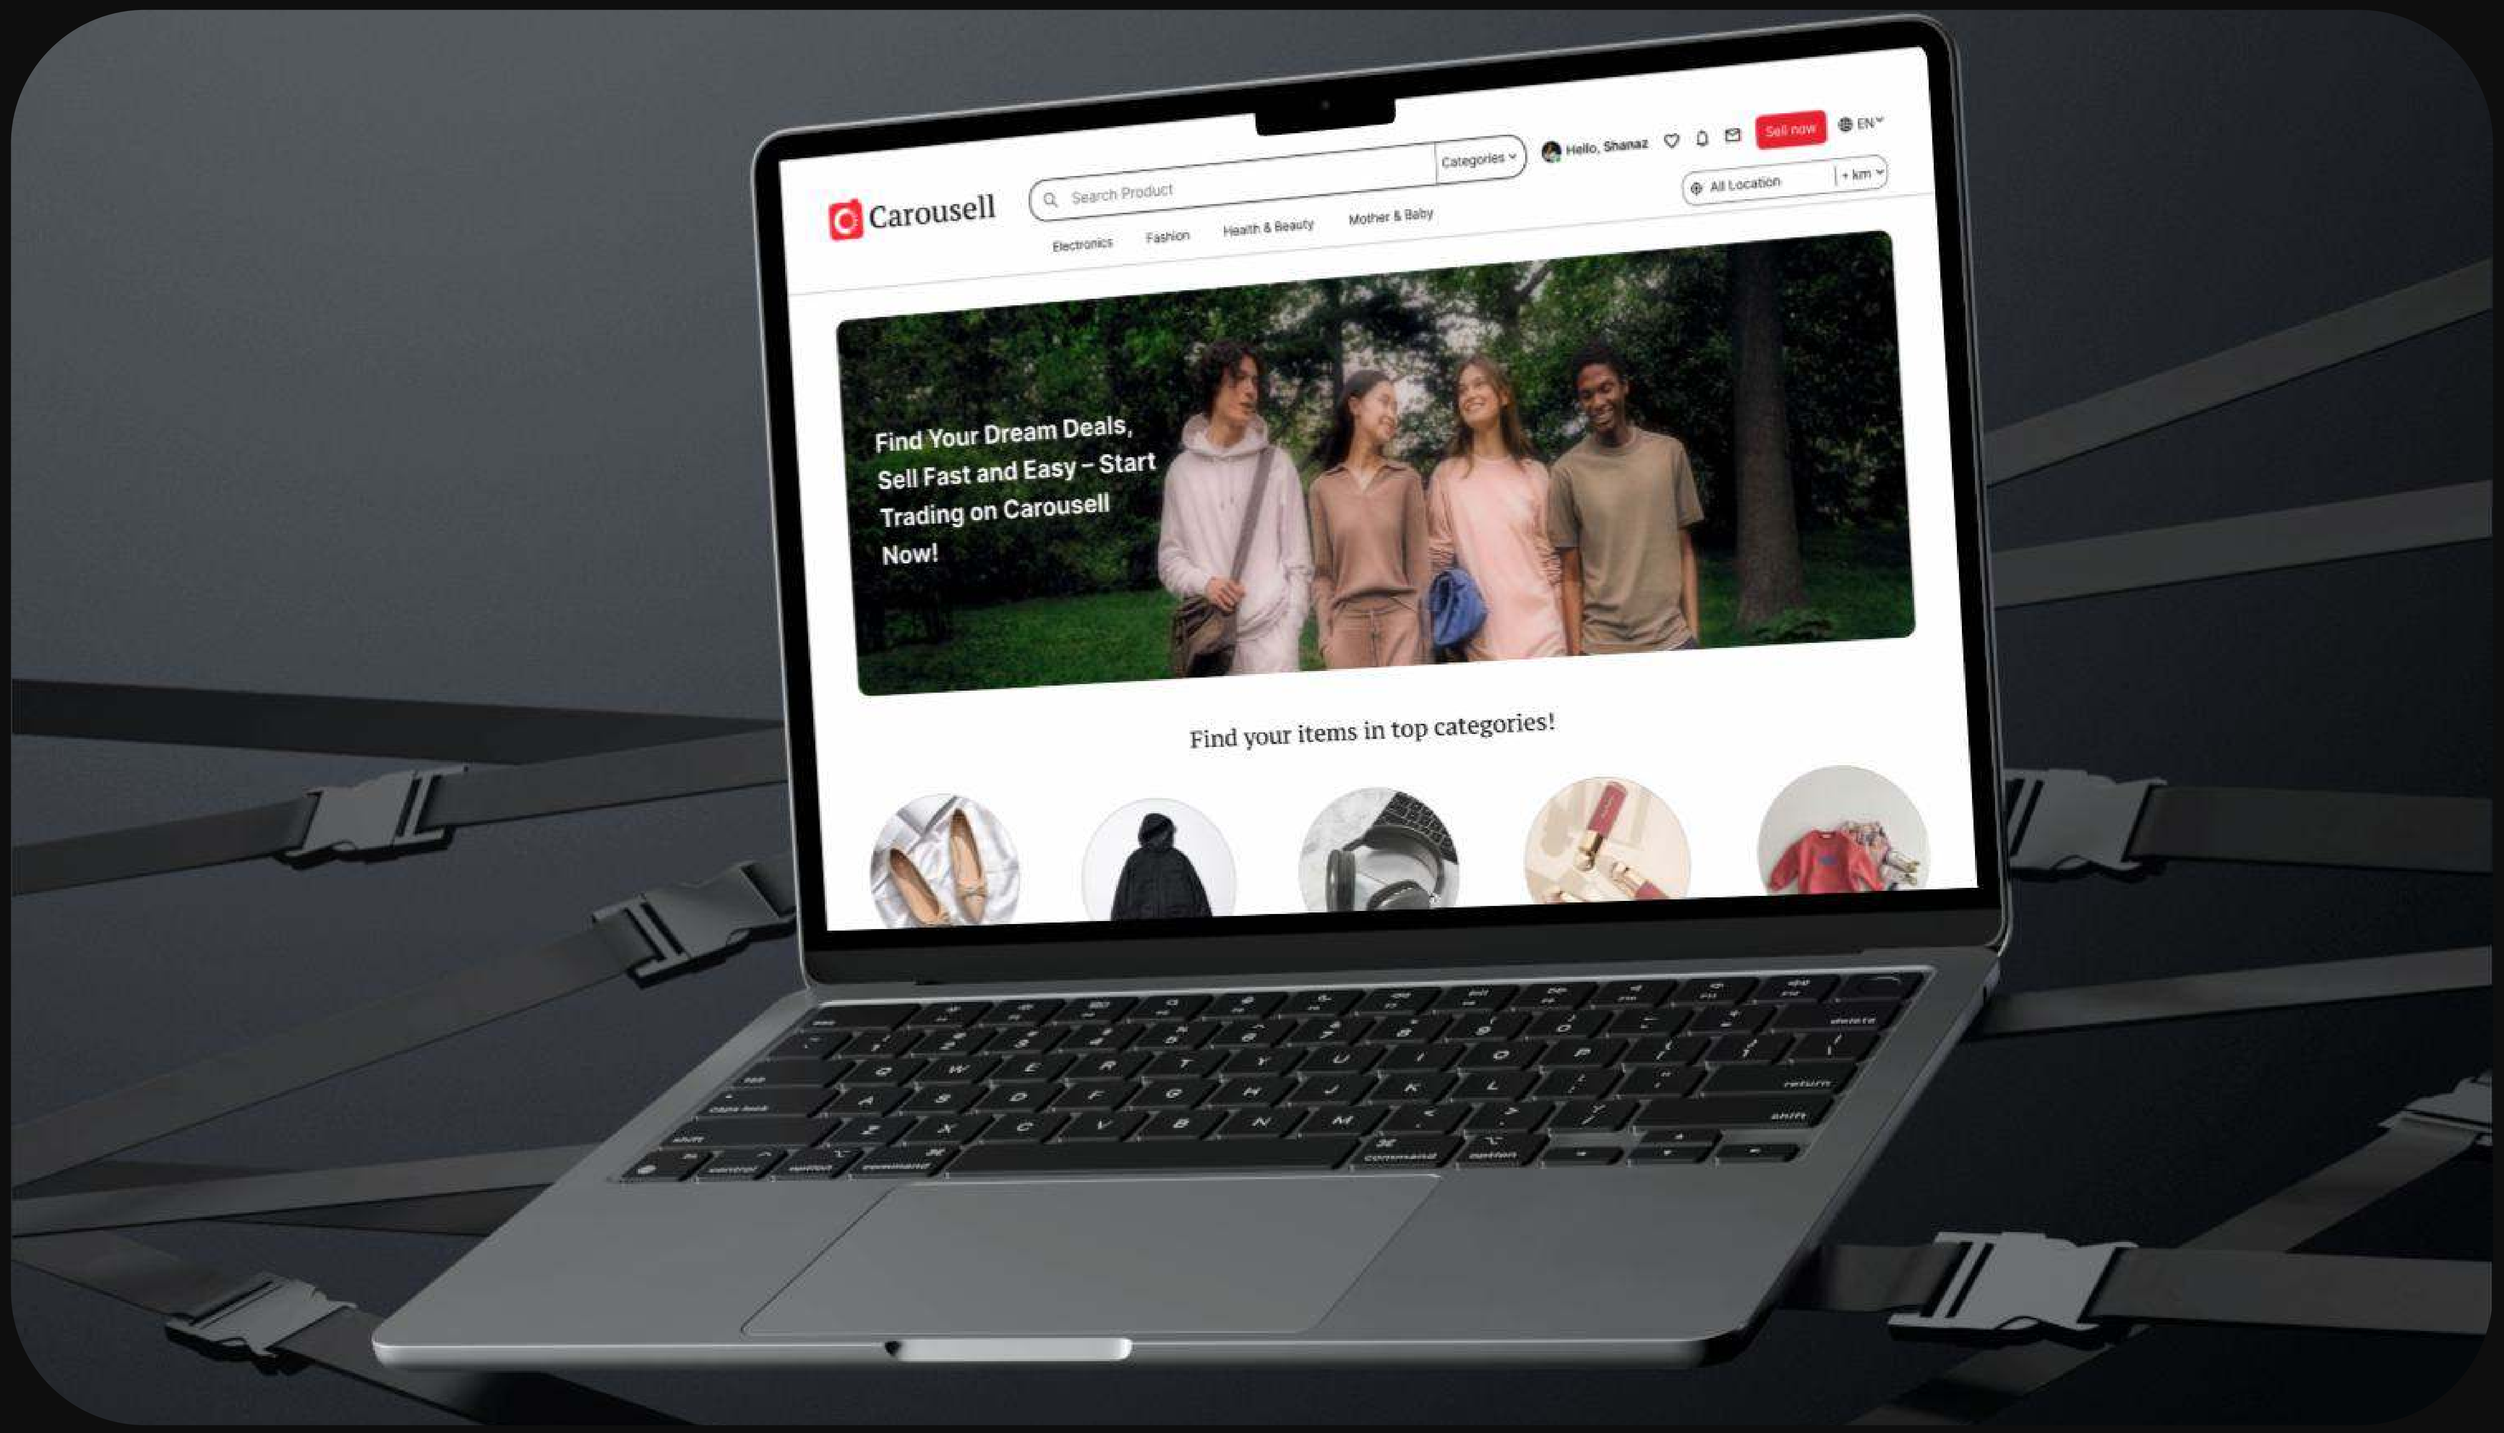

Seller Verification Page

1. Verify social media account seller.
2. Where to upload the seller's ID card.

Seller Verification Page

3. Identification of personal information.

2024 Mobile Improvement - HappyFresh

Mobile App

Redesigning HappyFresh Application For **Optimize And Enjoyable Shopping**

Role

UI/UX Designer

Duration

2 Weeks

User Behaviour

Likes shopping online

Tools

About the Project

Happy Fresh is a well-established online groceries store, catering to customers looking for convenient and high-quality grocery shopping experiences. In an effort to stay competitive and boost overall business performance, Happy Fresh aims to revamp its online platform with a specific focus on increasing conversion rates.

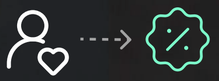

Market place is the choice of the majority of Indonesians (82%) to buy electronic products, household needs and health compared to social media (13%) or offline (6%). (Sumber: Kumparan Bisnis)

Goals

Provide Happy Fresh customers with an optimized and enjoyable online grocery shopping experience, leading to increased conversion rates. The revamped platform should not only attract new customers but also encourage repeat business, ultimately contributing to the overall success and growth of Happy Fresh in the online groceries market.

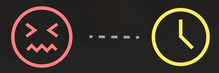

Shopping at online supermarkets can also save your wallet. Many promos are offered such as free shipping, and discounts on purchases. (Sumber: Happy Fresh & Kumparan Bisnis)

Promo / Discount

Why Happyfresh needs to be Improved?

Time Saving

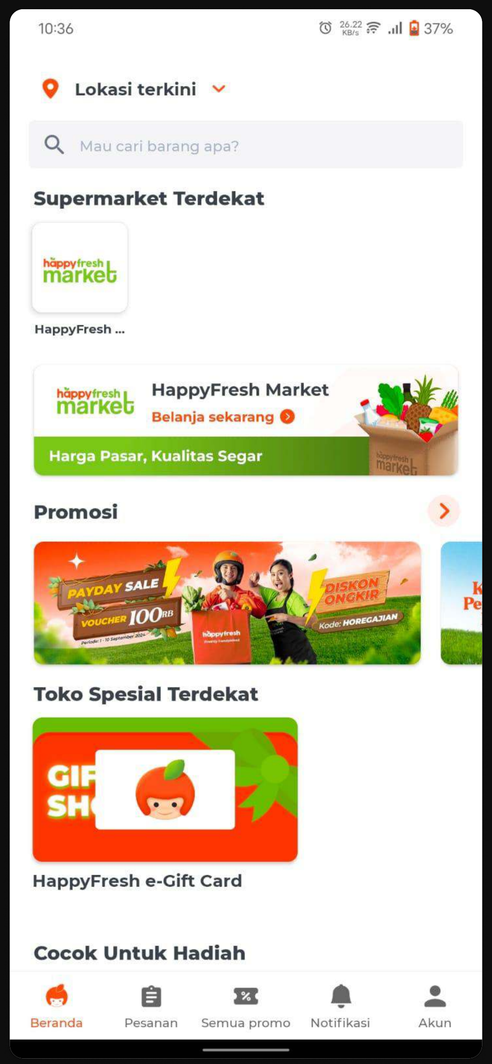

People can easily find out details about a product through various platforms and easily shop anywhere.
(Sumber: Kompas.com)

Design Solution

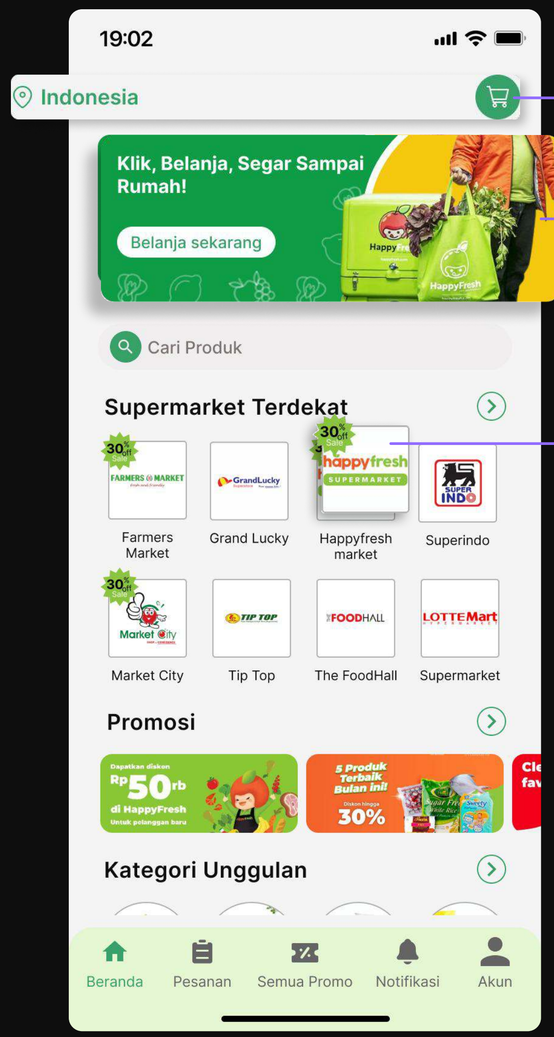

Feedback and Difficulties

1. "I find it difficult to see which stores have promos and I don't have much time to check each store one by one."
2. "too difficult if there is no list in the cart that can be navigated quickly."

Before

After

Homepage

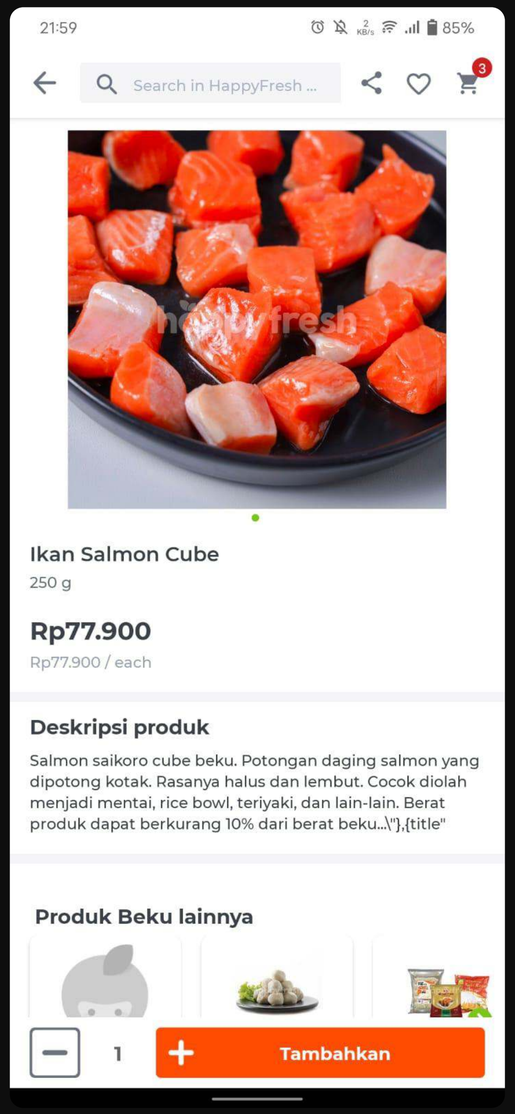

1. Added headers for location, and cart.
2. Added a hero about the Happyfresh and partnership.
3. Added in-store promotions are more noticeable.

Feedback and Difficulties

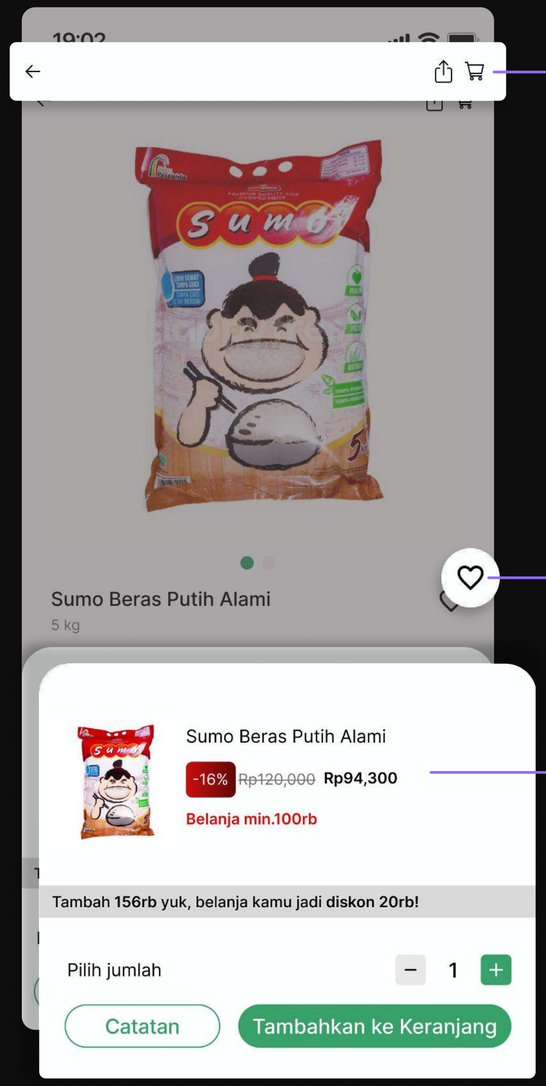

1. “I find it difficult to see the minimum payment for shopping at happyfresh and the remaining shortage to place an order at happyfresh.”

2. “My suggestion, when inserting items into the cart there is a small display confirmation to minimize input errors and make us believe in product prices.”

Before

After

Product Page

1. Change the heading display.

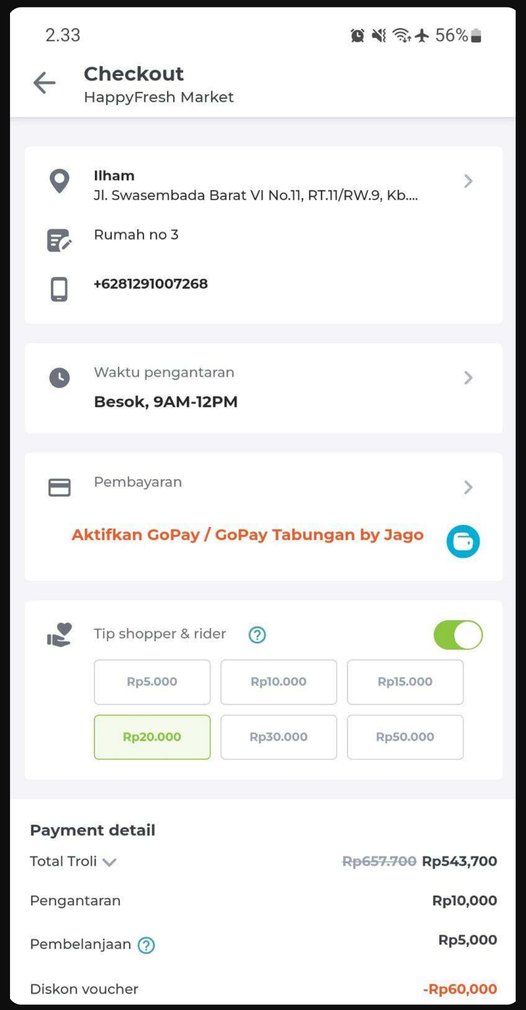

2. Change the love product navigation position

3. Added a small display to confirm the quantity and price of items before they are added to the cart.

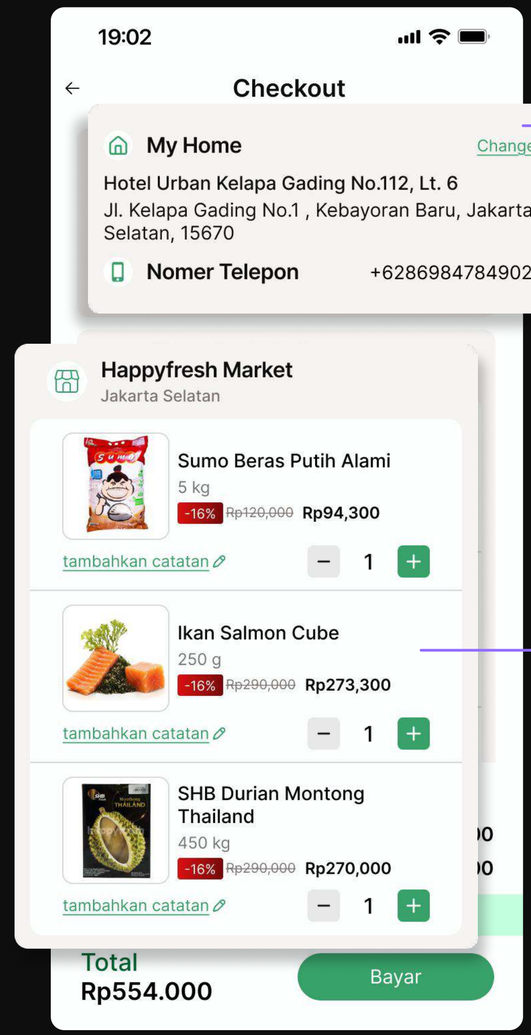

Feedback and Difficulties

1. “I find it difficult on the checkout page because there are no products that I checkout so I can't confirm whether the products I checkout are correct or not.”

Before

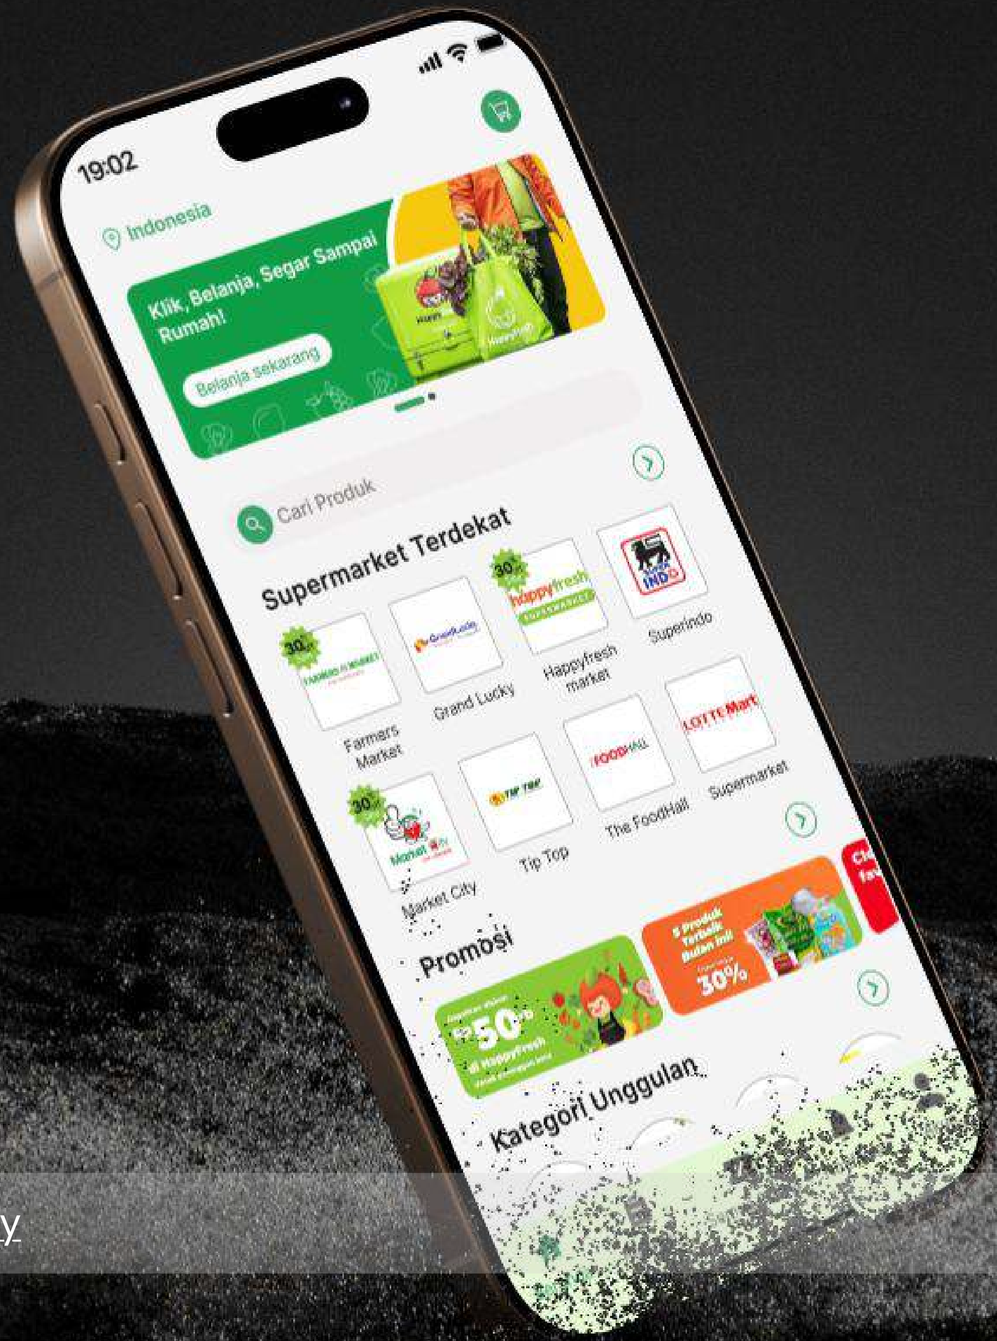

After

Checkout Page

1. Change home address.
2. add checkout product section
